SUMMARY

2nd-year B.Tech CSE student with hands-on experience in machine learning, data analytics and full-stack development, gained across three data science internships and multiple deployed projects. Seeking internships in software development, data science and AI/ML.

EXPERIENCE

Data Science Intern (Industrial Training) | GRAFX IT Solutions *Nov 2025 – May 2026*

- Engineered a diabetes-risk prediction model (Scikit-learn, Random Forest) achieving 74.68% accuracy and 0.8263 ROC-AUC on 768 patient records, validated with 5-fold cross-validation (0.828 ± 0.018 mean ROC-AUC).
- Deployed the model as a Flask web app delivering real-time predictions with Chart.js feature-importance visualizations.

Data Science & Analytics Intern | Future Interns *Sep – Oct 2026*

- Designed and deployed three Streamlit dashboards that surfaced sales performance trends, churn drivers and funnel drop-off points for business review.

Data Science Intern | Pinnacle Labs *Aug – Sep 2025*

- Built a sentiment-analysis project applying NLP techniques to real-world text data and presented the results via a recorded demo.
